izon 2020 *** Programme

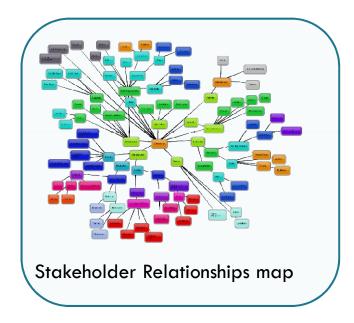

Setting the scene

Everybody uses the word **stakeholders**, but what does it mean?

Generally, a person with an interest or concern in something

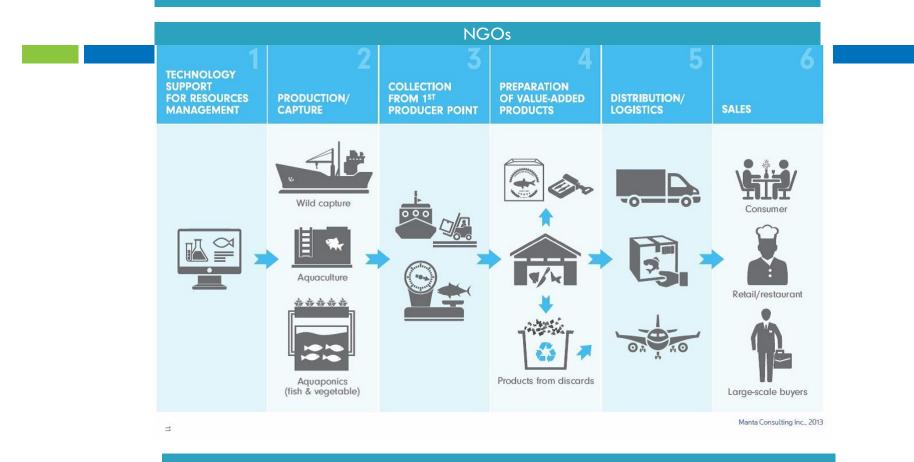

For PrimeFish, any group, association or individual who uses, depends, is affected by, or able to affect Seafood at an European context.

Governance: policy makers, public authorities

Scientist, general society

Main stakeholders in PrimeFish project

In particular:

- Fishing sector
- Aquaculture
- Processor
- Consumers
- Policy-makers
- Environmental NGOs....

BUT ALSO the scientist are stakeholders.

SPECIAL ATTENTION TO THE INDUSTRY REFERENCE GROUP

Consumer: key

**** Programme

Seafood industry is driven by consumers choices and decisions

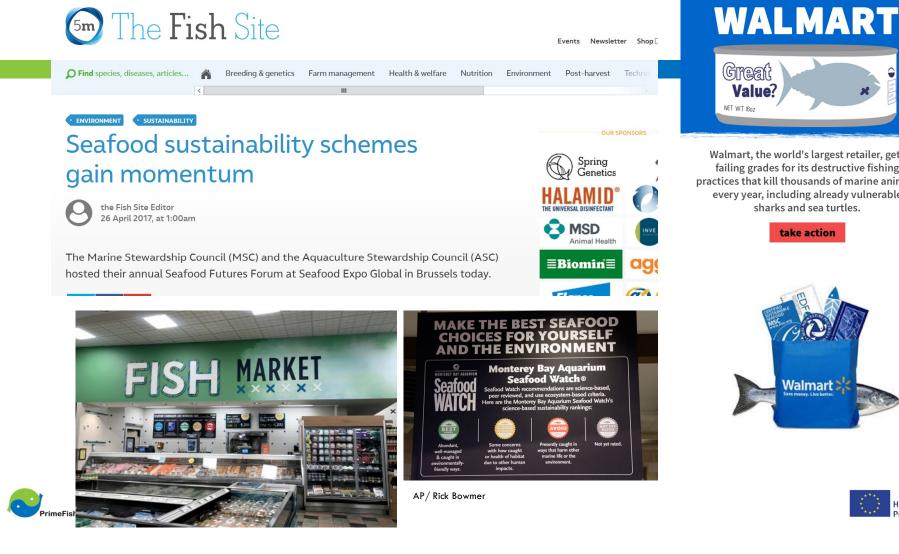

Many factors that help such decisions:

- Eco-labeling, accreditation schemes
- Government/fishing policy/health policy
 - Production/harvesting practices
 - Discards and food waste
 - Food security
 - Retail strategies....etc.
 - Even media....

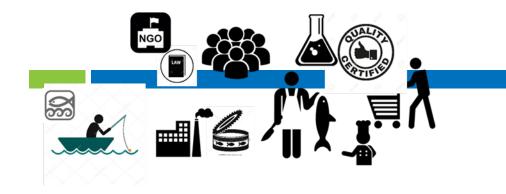

Walmart, the world's largest retailer, gets failing grades for its destructive fishing practices that kill thousands of marine animals every year, including already vulnerable sharks and sea turtles.

take action

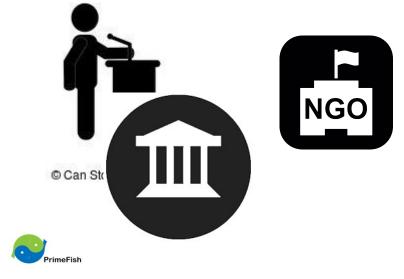

Policy makers and NGOs

NGOs focused on sustainability and environmental issues

Policy makers establish the rules and regulations of the play: Governance legislation

Policy makers are focused on both economic and environmental sustainability

Wholesalers & Distributors

- Influence the consumer preferences
- Can promote sustainability by ensuring their products are sourced from sustainable fisheries

Power of decision Prices Purchase concentration

> Horizon 2020 Programme

Retailers

Direct contact with consumers Increasing power of decision Distribution channels

Producers

GETTING THE PARTICIPATION RIGHT & GET THE RIGHT PARTICIPATION

- Participation of stakeholders in fisheries management is a key for instance of the ecosystem approach,
- But what happen with seafood value change or seafood competitiveness?
- Art. 3 CFP: "The CFP shall be guided by the following principles of good governance: ...f) appropriate involvement of stakeholders in particular Advisory Councils, at all stages from conception to implementation of measures."

The Market Advisory Council is a stakeholder-led organization that provides the European Commission and EU Member States with recommendations on matters relevant for the EU market of fishery and aquaculture products and within the tasks defined in Article 44 of Regulation (EU) No 1380/2013.

The MAC is composed of representatives of more than 55 members from 11 Member States, representing the whole value chain from both sector organizations and

other interest groups.

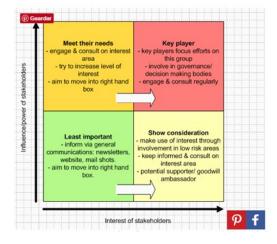

Finding out the stakeholder interest in seafood value chain

- Once you have mapped the interests of your stakeholders you need to prioritise them in order of importance.
- This step will drive your stakeholder engagement strategy. Different methodologies suggest different ways of analysing stakeholders.
- A common approach is to map the interest and power or influence of each stakeholder group on a quadrant (Bryson 1995).

PrimeFish stakeholders

Stages of Stakeholder Interaction in PrimeFish

Introduction of the project and related activities Receive data, insights and feedback for/from researching

Validation of results

April 2016

- Measures to identify and map end-users and relevant stakeholders:
 - Surveys
 - Informal conversations
 - Structured face-to-face stakeholder interactions (e.g. cocreation)
 - Grouping profiles (e.g. Industry Reference Group)
 - Remote interactions (e.g. Skype)
 - On line audience analysis

For instance:

Internal reporting in parallel to WPs activities
